

Scenario Systems International Inc. (OTC-PK: SSII), Signs \$650K Consulting Agreement With Major Canadian Bank

Chicago IL- 28 September 2007 (Business Wire) Scenario Systems International (OTC-PK: SSII), Signs \$650K Consulting Agreement With Major Canadian Bank.

Scenario Systems International announced that it has signed a \$650,000 consulting engagement with a major Canadian banking corporation to audit and manage their IT Infrastructure. In addition, Scenario Systems will develop methodologies to be used to integrate, virtualize, and architect autonomic solutions.

About Scenario Systems International

Scenario Systems International is an international consulting company who focuses on IT Financial Management, with a particular emphasis on asset management and tracking. We have developed a proven integration management methodology that provides speed of delivery in a repeatable and sustainable process. This includes best practice tools and processes, as well as resource readiness and the program management office process and structure to ensure successful roll-out. In addition, the framework offers rapid deployment with continual evolution so that customers can immediately begin aligning execution with organizational strategy.

The Private Securities Litigation Reform Act of 1995 provides a "safe harbor" for forward-looking statements. Certain information included in this communication (as well as information included in oral statements or other written statements made or to be made by Scenario Systems International or its wholly owned subsidiaries) contains statements that are forward-looking, such as statements relating to the future anticipated direction of the medical and technology industries and plans for future expansion, various business development activities, planned capital expenditures, future funding sources, anticipated sales growth and potential contracts. Such forward-looking information involves important risks and uncertainties that could significantly affect anticipated results in the future and, accordingly, such results may differ from those expressed in any forward-looking statements made by or on behalf of Scenario Systems International or its wholly owned subsidiaries. These risks and uncertainties include, but are not limited to, those relating to development and expansion activities, dependence on existing management, financial activities, domestic and global economic conditions, changes in federal or state tax laws, and market competition factors.
